

DC 12V/24V Electric Air Conditioner

GUCHEN Ecooler2400

- Driven by DC 12V/24V electric compressor
- No-idle air conditioner, can use when the engine is run off
- Brush-less fans, long lifetime, lower power consumption
- Remote control, combined with manual
- Use environmentally friendly R134a refrigerant
- Optional heater pump heating

Installation Drawing

Specification

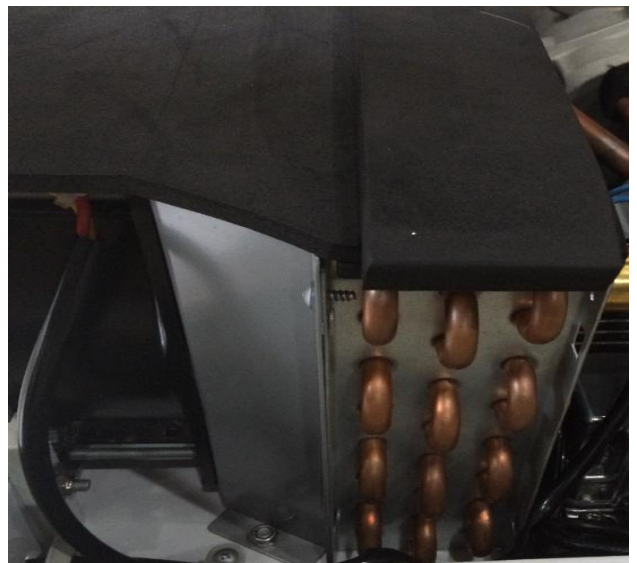

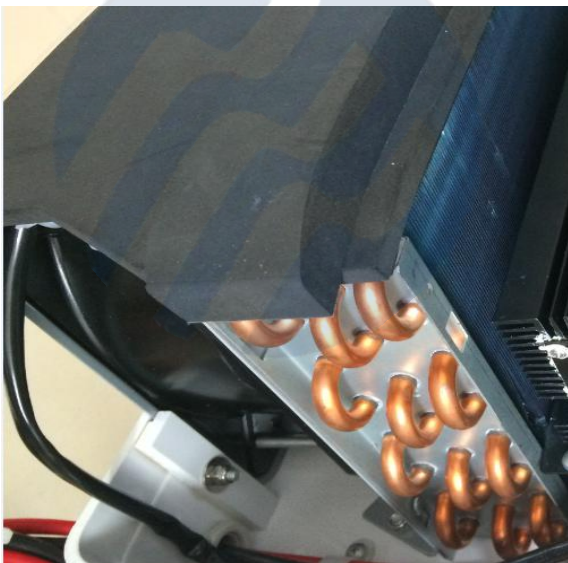

Model		Ecooler2400
Cooling Capacity		2400W/8200BTU/2000Kcal/h
Voltage		12V/24V
Rated Current		55A/30A
Power		600W-860W
Compressor	Model	Electric scroll compressor
	Displacement	18cc/r
	Rotate Speed	1500 - 4500rpm
Evaporator blower air vol.		650m3/h
Condenser fan air vol.		1050m3/h
Refrigerant		R134a
Refrigerant charging weight		330g/360g
Dimensions		700*580*263mm
Weight		32kg
Vehicle Applications		All trucks, construction machinery , tractor etc.

Air conditioner parts

1. The air conditioner shell made of mould, more better quality and beautiful appearance

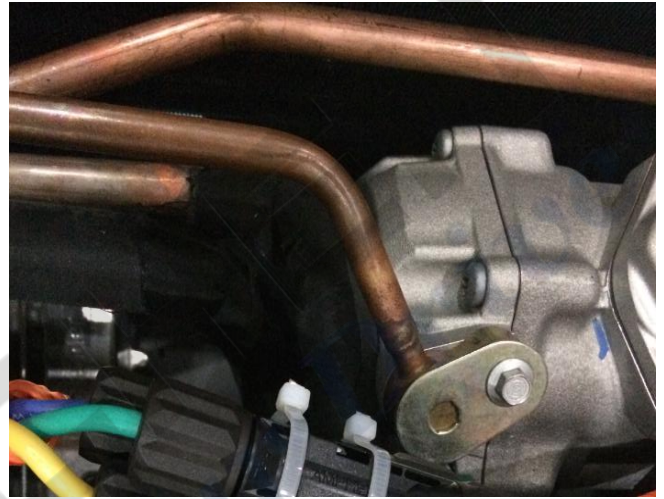

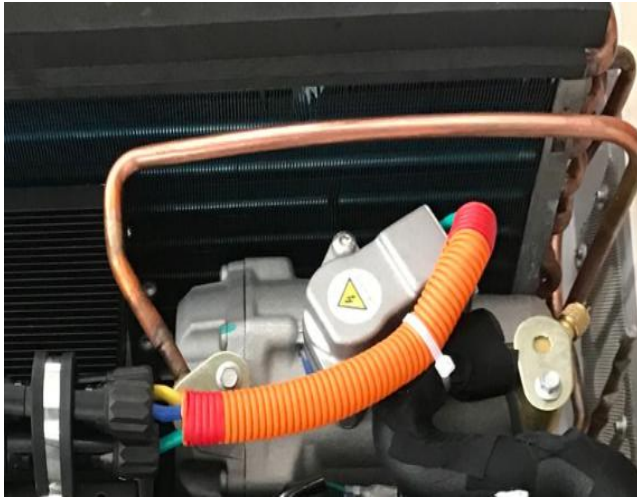

2. The evaporator and condenser coil tube use copper, more resistant to corrosion and bigger cooling capacity

Air conditioner parts

3. All of the connect use the cooper tube, longer life and more better leak proof

4. The air conditioner both side have the strainer, prevent debris into the air conditioning and better ventilation

Air conditioner parts

5. The return air grille have the removable mesh, easy to cleaning and keep the air conditioner inside clean

6. Control panel and remote control two control type

Air conditioner parts

7. Complete installation kits and installation instruction, help customers more easy and convenience install the air conditioner

8. More reasonable way of packing, ensure the safety of the air conditioner
